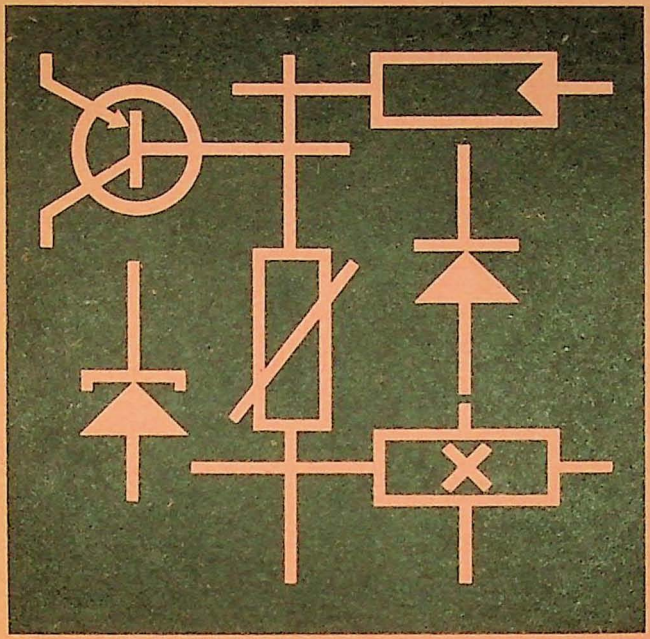
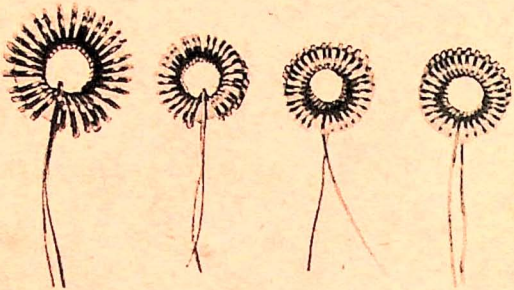
Vergleichsliste

für

Transistoren, Dioden und Halbleiterschaltungen

International





Entstördrosseln für Thyristoren und Triacs.

Anwendungsbereich:

Alle Thyristor- und Triac-Schaltungen, wie Lichtdimmer, Lichtorgeln, Waschgeräte, Regelschaltungen für elektrische Maschinen, Bohrmaschinen usw.

Vergleichsliste 1973/74

für Transistoren, Dioden
und Halbleiterschaltungen

Nachdruck mit freundlicher Genehmigung der

Firma **Siemens AG, München.**

In vorliegender Liste sind gebräuchliche Halbleiter-Bauelemente alphabetisch zusammengestellt. Neben der Angabe der Hersteller, die keinen Anspruch auf Vollständigkeit erhebt, ist der entsprechende Siemens-Typ genannt. Eine einwandfreie Austauschbarkeit ist jedoch nicht immer gewährleistet. Im Einzelfall ist zur Bestimmung des günstigen Ersatztypes ein genauer Vergleich zwischen Datenblatt und geforderten Daten notwendig.

In Klammern angegebene Typen können nur bedingt als äquivalent angesehen werden. Die Unterschiede liegen entweder in den elektrischen Daten oder in der Bauform. Es sind folgende Abkürzungen zu beachten:

◆	Typ wird nicht mehr gefertigt
■	Typ ist nicht für Neuentwicklungen bestimmt
US	Typ wird ausschließlich von amerikanischen Firmen vertrieben

bl	blau	Abkürzungen für Stromverstärkungsgruppen
br	braun	
ge	gelb	
gn	grün	
gr	grau	
or	orange	
rt	rot	
vi	violett	
ws	weiß

Die Serie SN 8400 N entspricht der Siemens-Serie FL 105.
Die gewünschten Typenbezeichnungen lassen sich von der Serie SN 7400 N ableiten, z. B. SN 8401 = FLH 205 usw.
